

PORTABLE ON-BOARD CHARGING GUN

3.5kW ONE GUN

This product is stylish, small and easy to carry. Support a variety of charging modes, meet the demand for charging at any time, provide stable and efficient energy supply for your travel, is a necessary choice for home travel.

PRODUCT ADVANTAGE

Lightweight and convenient:

Small and lightweight, easy to carry, provide energy supply at any time.

Safe and reliable:

Advanced technology ensures a safe and worry-free charging process.

Application scenario:

If the battery runs out and there is no charging pile nearby, the onboard charger can be used as a backup charging scheme to help the user recover the driving ability as soon as possible and avoid a long wait for rescue.

3.5kW Car charger ONE GUN

Technical Specifications

Model	HDRCDZ-220V-16A-3.5KW-1
Connector Standard	GB/T / Type1 / Type2 (optional)
Input Voltage	220 V ±15%
Frequency	50 / 60 Hz ±10%
Output Voltage	220 V
Rated Power	3.5 kW
Max Output Current	16 A
Number of Connectors	1
Cable Length	5 m (customizable)

Other information

Running indication	Power, charging, failure
Man-machine display	Screen display
Charging operation	Plug and play
Method of measurement	No charge
Heat dissipation control	Natural cooling
Measurement accuracy	first-order
Leakage Protection	30 mA
MTBF	30,000 hours
Operating temperature	-25 °C to +50 °C
Mean relative humidity	5% ~ 95%
